• ABOUT ME

Software Engineer with 4+ years of experience building web and mobile applications in Laravel, Flutter and Next.js for clients in the Netherlands and the USA. Shipped 4 client products to production, including a real-time platform serving thousands of concurrent users and a Laravel system syncing 6+ WooCommerce stores and 50,000+ products. B.Eng. Software Engineering student at Tampere University of Applied Sciences.

• WORK EXPERIENCE

01/01/2026 - CURRENT - REMOTE

SOFTWARE ENGINEERFREELANCE

UNiFY (USA Based Contract)

- Stabilized a crash-prone Flutter/Flask app for production by fixing critical bugs and client-backend data mismatches.
- Scaled live scores and in-app chat to thousands of concurrent users by building a WebSocket backend, with NFC ("Baller Band") and push notification integration.
- Secured payment processing by building a PostgreSQL, Redis and AWS backend with Stripe and Redis caching.

19/05/2025 - 30/06/2026 - NITTAMBUWA, SRI LANKA

ASSOCIATE SOFTWARE ENGINEERDAYZ SOLUTIONS (PVT.) LTD.

Deurbeslag Gigant (Main Project)

- Owned a live Laravel platform and stopped recurring sync failures across 6+ WooCommerce stores by root-causing them and refactoring into service classes, repositories and thin controllers.
- Prevented overselling across 50,000+ products by leading the Bol.com REST API integration (rate limiting, retries) on a multi-store design that scales to any number of stores.
- Sped up search across the 50,000+ catalog with Meilisearch and automated fulfilment through GLS, DHL and Dropbox integrations.

ECore Web + Mobile App (Lead Mobile Engineer)

- Led mobile development of a Flutter/Dart app from 0 to release with other engineers, owning every technical decision in direct coordination with engineering leadership and the Director.
- Directed the design of the scheduling and workflow views for machinery, work orders and staff, and led the real-time REST/WebSocket integration for live order and machinery tracking.
- Contributed to the Laravel web app with database optimization and the migration to Livewire 3.

BusinessLabels.nl (Full-Stack Developer)

- Improved search-ability across a 50,000+ product catalog by building responsive React components from Figma specs.
- Synced frontend/backend data by integrating Next.js with the Laravel REST API for account and product management.
- Fixed a critical checkout bug and stabilized deployment for both apps using PM2.

01/08/2022 - 01/06/2025 - REMOTE

SOFTWARE DEVELOPERFREELANCE

- Delivered Laravel client management and admin panel platforms for paying local businesses, turning self-driven projects built alongside my HND studies into paid client work.
- Built a dual cashier and inventory retail system in C#.NET on one shared SQL database, earning income while studying for my HND.
